## Statistics

- Submissions
  - 25 papers
- Accepted
  - 7 full papers
  - 4 short papers
- Acceptance Rate: 44%

## Program Committee

- Jan Algermissen, Nord Software Consulting, Germany
- Subbu Allamaraju, Yahoo Inc., USA
- [Mike Amundsen](#), USA
- [Benjamin Carlyle](#), Australia
- [Stuart Charlton](#), Canada
- [Duncan Cragg](#), ThoughtWorks, UK
- [Joe Gregorio](#), Google, USA
- [Michael Hausenblas](#), DERI, Ireland
- [Ralph Johnson](#), University of Illinois, USA
- Rohit Khare, 4K Associates, USA
- Yves Lafon, W3C, USA
- [Frank Leymann](#), University of Stuttgart, Germany
- Alexandros Marinos, University of Surrey, UK
- [Ian Robinson](#), Thoughtworks, UK
- [Stefan Tilkov](#), innoQ, Germany
- [Steve Vinoski](#), Verivue, USA
- [Tomas Vitvar](#), ProgrammableWeb
- [Jim Webber](#), NEO4J
- [Olaf Zimmermann](#), IBM Zurich Research Lab, Switzerland

Second International Workshop on RESTful Design

# Program

8:30-10:00	Keynote by Stuart Charlton
10:30-12:00	I. Hypermedia and MDD
13:30-15:15	II. REST Frameworks
15:45-17:15	III. Security

Full Papers **25+5 minutes**

Short Papers **10+5 minutes**

# Keynote

## I'll See You on the Write Side of the Web by Stuart Charlton

Erik Wilde · Cesare Pautasso *Editors*

**REST: From Research to Practice**

Exploring ways of developing and implementing applications for REST, the Representational State Transfer system architecture conceived along with the World Wide Web, is gaining prominence as a research topic in academia and industry. Edited by two of the leading lights in REST research, this volume features edited and expanded papers from a key workshop at the 2010 World Wide Web conference, as well as further contributions by researchers on the cutting edge of REST development. The chapters aim to build understanding between those engaged in the abstractions of academic research on REST and the many originators and designers of processes claiming to be 'RESTful'.

As well as covering the core principles of REST's architectural style, this significant contribution to the literature on Web development examines a number of REST applications that appear to display advantages over its competing 'WS' architecture. Contributors also assess the benefits REST brings to pervasive computing and cast an eye towards the future with a section on open research questions such as deciding on resource granularity, modeling metadata, and handling transactions.

# ECOWS'11

The logo for ECOWS'11 features the text 'ECOWS' in a large, bold, sans-serif font. The 'E' is black with a white outline, 'C' is grey, 'O' is light grey, 'W' is dark blue, and 'S' is dark blue. To the right, the year '11' is in a light grey font, with a small flag of France (blue, white, red vertical stripes) and a small flag of Switzerland (red square with a white cross) positioned below the '1's.
